

## Create project on College Registration system using following details.

Use Static members and enum where applicable.

Use at least 1 enum and 1 static member in the assignment.

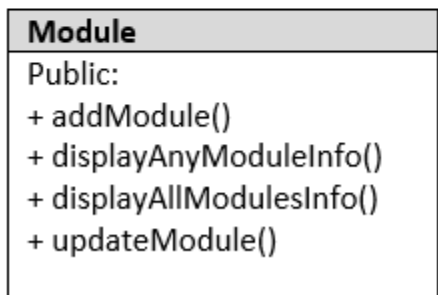

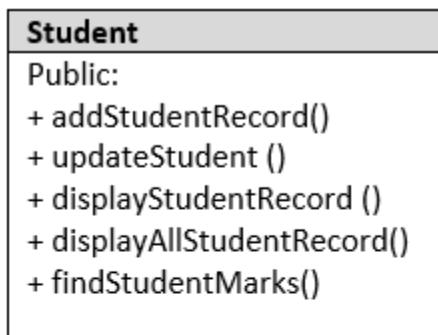

OverLoad the ++ and += operator to increase the Students Marks as below;

```
e.g. Student s = new Student(.....);  
    s++;          // this should increase the total marks by 1  
    s += 50;      // this should increase the total marks by 50
```

### Features

- Add student record
- Update student record
- Display student record
- Add modules
- Display module details
- Update Module

### Class Diagram of Project

Output Screen with look like below :

# College Registration System #

1> Add Record

2> Update Record

3> Get any record

4> Get all record

5> Add Module

6> Get Any Module details

7> Get All Modules details

8> Update Module

9> Find Std Marks

0> Exit..
